Book III – Terminal Information

**2020**

## Table of Contents

<b>1. INTRODUCTION.....</b>	<b>3</b>
<b>2. TERMINAL OVERVIEW .....</b>	<b>3</b>
2.1. INFORMATION ABOUT PRIVATE TERMINALS .....	4
2.2. INFORMATION ABOUT MARSHALLING YARDS BELONGING TO INFRASTRUCTURE MANAGERS .....	10

## 1. Introduction

As Terminals and railway Infrastructure Managers together serve the needs of railway operation by providing the infrastructure for trans-shipment of consignments and for running of trains, their common interest is to cooperate in the frame of this activity. Regulation 913/2010/EU about establishment of rail freight corridors is also encouraging this process by obliging IMs and Terminals to harmonize their traffic management and capacity-allocation procedures.

In Regulation 913/2010, terminals are broadly defined. They can be the Infrastructure Managers' marshalling yards and sidings which are necessary for rail system operations such as train formation operations. They can also be many other entry points of the various transportation systems in the commercial zone of influence of the corridor:

- combined transport terminals;
- river ports;
- multimodal platforms;
- maritime ports;
- private rail freight terminals

The voice of customers is taken into account via the Terminal and the Railway Undertaking Advisory Groups. In these groups participation is on a voluntary basis. Advisory Groups members have a dedicated area in the RFC OEM website, where all materials on consultation are available, including the Consultation Rules, which is a public document. Registered members also got information via e-mail.

To join the Advisory Groups please contact the [Secretariat](#) and/or the representative of the Advisory Group.

- Representative of RFC OEM RU AG is RCH.
- Representative of RFC OEM Terminal AG is RCA, the deputy representative is WienCont.

The main role of the representatives is to coordinate the position of the group. The group's opinion has to contain both majority and minority opinions.

Book 3 of the Corridor Information Document contains the list and characteristics of terminals, in particular information concerning the conditions and methods of accessing the terminals.

## 2. Terminal overview

In order that our partners have always access to the most up-to-date information, the cross-links to the websites of the terminal managers and to the network statements of infrastructure managers are provided for this purpose.

Information about private terminals and information about marshalling yards belonging to railway infrastructure managers are shown in two separate maps and tables below.

## 2.1. Information about private terminals

For detailed information, please you the links in the tables below:
